

THE AUGURS

THE CRYSTAL BALL GAZERS OPEN THE MYSTERY DOORS TO THE FUTURE

Though 2012 is widely predicted to be "the end of the world", it would be more accurately defined as "the end of an old operating system". 2012 heralds the ushering in of a new consciousness, partially born from necessity, and partially born from ingenuity. Keeping an open mind is the name of the survival game. From what I am able to witness, most of the 2012 passes without great incidents. However, the latter part of the year appears to have some challenging instances which bleed over for many years to come. It is ironic that 2012 is the

year earmarked as "the end" when most of the challenging events sparked in latter 2012 actually occur in 2013! These instances involve natural progressions like sea swells in the Atlantic Ocean, which result in great walls of water pummeling the eastern United States coast, the switching of the planet's poles causing earthquakes or a massive explosion, such as a celestial impact in the southern oceans, affecting weather patterns.

Change is imminent in all cultural timelines, and all think it to be "the end" when it is upon them. However, humanity always survives. 2012 will not be the first major shift, nor will it be the last. It's simply the one that we are currently aware of. **ISI**

Your Ganesha devotee has said it again and again that the 21st century will be the biggest, brightest, and best in the history of mankind.

In 'Cosmos and Psyche', author Richard Tarnas has pointed out the Saturn opposite Uranus alignment from September 2007 till July 2012. Saturn symbolises the mass-

es. Uranus stands for sudden upheavals, events, happenings. If we combine the two, we can conclude sudden death of millions of people. But the greatest of astrologers, psychics, seers do go hopelessly and totally wrong. It is not easy to pierce the veil of the future and some limited damage may take place, but Ganesha is there, and I stick my neck out and say that 21st century will be the biggest, brightest and the best in the history of mankind.

It is by no means the end! Says Ganesha. **ISI**

2012 marks the dawn of a new era; of peace, respect, cooperation and collaboration among all men. It introduces the awakening of a higher intuitive intelligence, clarity, and creativity; an intelligence that clearly reveals how the harming of one individual harms the whole, and can no longer be justified, as it is a self-destructive policy.

We will continue to experience dramatic and direct feedback of our ignorance in the form of extreme weather patterns, shocking earth-

quakes and water shortages that our destructive policies and practices can no longer be ignored. This is not to suggest that human life is facing extinction. Only the way we manage and conduct ourselves, especially those in mass denial or disinterested in the value of human life and the value of the earth, as individuals and countries will face many forms of extinction. Beginning of 2012, and forward, the earth will force humanity to wake up and stop destroying it and each other in an attempt for world dominance.

It is not as though some terrible force will be unleashed in 2012. The changes will be more subtle, and expansive. **ISI**

2012 is a blessing in disguise for Mother Earth, Gaia and the human race. It's a reminder that we are, in essence, spiritual beings living a human existence and not humans trying to be spiritual. 2012 effects are already being felt in the economy, and what's taking place is bringing an or-

ganic shift within people's lives. It's nudging people to follow their hearts. People will have less fear to do what they want, more transparency and honesty is the way. Those who don't listen to the nudges will have a hard time in 2012. But those who are already taking heed to live a spirited life and doing all things they love and having a positive outlook in life, will certainly have a wonderful 2012.

2012 is leading us to a fearless, loving society. **ISI**
